

Electric mobility and sustainable urban mobility planning

Sustainable urban mobility planning

Sustainable urban mobility planning includes 4 frameworks with a total of 12 steps.

The first framework is preparation and analysis and includes the following steps:

- Formation of working structures
- Defining the planning framework
- Analysis of the state of mobility

Sustainable urban mobility planning

The second framework is strategy development with the following steps:

- Creation and joint evaluation of scenarios
- Developing vision and goals with stakeholders
- Defining goals and indicators

Sustainable urban mobility planning

The third stage is the measurement planning:

- Selection of a package of measures with stakeholders
- Agreed actions and responsibilities
- Preparation for adoption and financing

The milestone of this framework and set of steps was the adoption of the Sustainable Urban Mobility Plan.

Sustainable urban mobility planning

The final framework is implementation and monitoring with the following steps:

- Implementation management
- Monitor, adapt and communicate
- Review and learn lessons

The turning point of the final framework and set of steps is the evaluation of the implementation of the measure.
