Project title	Partnership for Promotion and Popularization of Electrical Mobility through Transformation and Modernization of WB HEIs Study Programs
Project acronym	PELMOB
Project reference number	101082860/ERASMUS-EDU-2022-CBHE-STRAND-2
Coordinator	University of Mitrovica
Project start date	December 01, 2022
Project duration	36 months

"Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union. Neither the European Union nor the granting authority can be."

EVENT DESCRIPTION

Date	23.09.2024.
Author	Osman Lindov,
Institution	University of Sarajevo - Faculty of Traffic and Communications
Event title	Research on the offer of electric vehicles in Bosnia and Herzegovina.

Event description:

Promotion of Electric Mobility and EV in Bosnia and Herzegovina

The Faculty of Traffic and Communications, as one of the partners of the Erasmus+ project "PELMOB - Partnership for the Promotion and Popularization of Electric Mobility through the Transformation and Modernization of Study Programs of Higher Education Institutions in the Western Balkans" (<https://pelmob.pr.ac.rs/>), aims to improve awareness of electric mobility in Bosnia and Herzegovina through a three-year cooperation program, in cooperation with 14 partners from the Western Balkans and the EU. Through the harmonization of policies, regulatory frameworks and encouraging innovation, an attempt is made to create an enabling environment for promoting progress in the field of energy-efficient technologies within the transport, transport and communication sectors. At the same time, it recognizes the necessity of cooperation with experts and industry stakeholders to ensure compliance with technological standards and best practices in achieving sustainable development of transport, transport and communications. E-mobility represents a significant challenge, which enables the effective realization of the set goals and the implementation of plans to reduce carbon emissions. Therefore, promotion and investment in education and professional development becomes crucial to ensure a successful transformation of the transport sector towards a more sustainable and environmentally friendly model. Our goal is to bring E mobility closer to the citizens of this segment of the automotive industry through electric vehicles that we have available on the BH market of all brands for promotion, procurement and use in the BiH area and beyond. We look forward to our and your joint creation of sustainable electric mobility!

P.S. After completing this research, we will invite all of you who participated with the presentation of your brands to a gathering at the Faculty in order to exchange ideas for the improvement of E mobility in the BH area. *Ph.D Osman Lindov, Traff.Eng. Project Manager*
Attached to this memo is a short survey about Electric Vehicles (BEVs or FCEVs) offers and opportunities from your brand. As many types of E vehicles as you have in your offer, fill out the table, only those E vehicles that can be obtained on the BH market.

Please return the completed survey to the e-mail: olindov@gmail.com

The Faculty of Traffic and Communications was the first in Bosnia and Herzegovina to embark on serious electric mobility. Five subjects were included in the curriculum of the Faculty, equipped the lab for e-mobility. We have acquired all kinds of e-mobility devices, both small and large, and we use them. Thanks to [Pelmob Erasmus+](#) and project leaders @FTNKM. Here is the confirmation of all the above and we are ready to help all those who want to deal with and cooperate with us, we are serious about this.
